

What's Happening...

A school -to-Home Newsletter from the class of Mrs. Molnar

Here are some highlights of the week

January 23-27, 2023

Monday: Students will write in their composition notebooks about our essential question. We will define vocabulary for the week. Students will explore decimals in the context of measurement and practice measuring in centimeters.

Tuesday: Students will be introduced to millimeters and convert from centimeters to millimeters. We will review and practice context clues. Students will complete a study guide in social studies to prepare for the chapter test.

Wednesday: Students will read and discuss the genre of Fantasy. We will compare decimals and review fractions. Students will read about Earth's resources and use pictures to explain how each source can be used for energy. We will take a social studies test.

Thursday: Students will take a math test over equivalent fractions, comparing fractions, writing decimals, and converting from centimeters to millimeters. We will complete a vocabulary crossword puzzle for science.

Friday: Students will take a comprehension and vocabulary test. We will begin a math research project and review point of view.
